

# NEW YORK STATE ENACTED BUDGET

2022 - 2023

The New York State budget enacted in April included provisions that make significant strides forward for children, especially in making child care affordable and accessible for more New York families and stabilizing the child care workforce. However, there is more work to be done.

The Children's Agenda will be pursuing additional investments through legislative and administrative avenues and continuing budget advocacy to lay the groundwork for investments in next year's budget.
